Special Summer and Autumn Planting List

Along one of the drives at the Nursery leading to the office. Many rare and beautiful evergreens are growing here, which can be transplanted, producing immediate effects.

AUGUST and SEPTEMBER are desirable months for the transplanting of practically all the HARDY HERBACEOUS PLANTS, STRAWBERRIES (pot-grown), and EVERGREENS. The weather conditions are so favorable that the newly trans-

planted plants get a firmly established root growth before cold weather. It is also a less busy time in the gardens, and the work of planting can be more thoroughly done. These are among the many advantages of planting at this season and should be taken advantage of by intending planters.

Specimens for Immediate Effects. Evergreens.

We have assembled here at the Nursery a splendid and extensive collection of specimen evergreens, many of them very rare and all of them beautiful. By the use of these specimens one can obtain effects which it would take years to gain if the usual sizes were used. These specimens take up with balls of earth and transplant with little or no set-back.

Deciduous Trees, Shrubs and Vines.

Immediate effects are so often important that we have anticipated the demand and devoted much space and time developing a splendid lot of these specimen TREES, SHRUBS and VINES. This stock has all been frequently transplanted and root pruned and takes up with such a splendid system of roots that success is practically assured.

Visit the Nursery.

We are always glad to have intending buyers and others interested visit our Nurseries and see the growing stock, the care we use in its development and our very complete facilities for handling it. While the Nurseries are open to visitors every day of the week, no business will be done Sundays.

Our General Descriptive Catalog.

We issue annually a Descriptive Catalog. This we strive to make as compact as possible, giving the sizes of stock we have to offer, with the prices and other useful information. This catalog is made to conform with the latest botanical classifications and may be looked upon as a convenient hand-book for reference. We are pleased to send it without charge to all who inquire.

Choice and Rare Evergreens for August and September Planting.

A handsome white pine (Pinus Strobus) about 12 feet high with ball of earth carefully secured with burlaps, just dug from a nearby block of fine specimens. We have a splendid lot of these specimen evergreens, which have been so frequently transplanted that large balls of earth can be taken up with each tree.

Why this Season for Transplanting Evergreens?

ALL the Hardy Evergreens transplant to special advantage during the months of August and September, and with good balls of earth even late into the Fall. Early planting gives ample opportunity to become well-rooted before cold weather, without the exhaustion incident to new growth which quickly follows Spring planting.

This is especially true of Autumn planting when Evergreens are taken up with balls of earth, a practice we recommend. All our Evergreens have been specially prepared by root pruning so that they take up with a splendid system of roots. Every care is taken at the Nursery to provide against exposure during digging and transporting of all our stock, especially the Evergreens.

How to Ship Evergreens.

When delivery is within economical distance for hauling by horses and teams, we recommend that way. Small orders to distant points can be boxed for shipping by freight or express, but where a number of specimen trees are to be sent, we advise shipping in bulk in car lots; this saves the cost of boxing and insures their arrival without injury. We gladly advise, if requested, the shipping method we recommend for individual shipments.

Prices of Evergreens.

See following pages for prices of the usual sizes. *The prices of specimens will vary with each plant, as they vary greatly in individual merit.* It is desirable to visit the Nursery and make a personal selection, but where this is not practicable, we will gladly make selections for a customer when we are advised what special material is desired. We will also recommend groupings for special effects to those who desire us to do so.

Choice and Rare Evergreens for August and September Planting

Cones of Scotch Pine.

withstands exposure to heat and drought better than any other evergreen we have. Its general appearance is so striking that it commands attention wherever planted.

	Each.	Per 10.	Per 100.
ABIES BALSAMEA (American Balsam Fir) 15 to 18 inches.	\$0.75	\$6.00
can Balsam Fir) 12 to 15 inches.	.50	4.00
ABIES CEPHALONICA (Mt. Enos Fir) Specimens, 2 to 3 feet, \$1.50 to	3.00
ABIES CONCOLOR (White Fir) Specimens, \$3.00 to	10.00
A beautiful spruce of rapid growth and undoubtedly	2.50
id growth and undoubtedly 18 to 24 inches.	2.00	17.50
15 to 18 inches.	1.50	12.50
12 to 15 inches.	1.00	7.50	\$60.00
ABIES CONCOLOR, VAR. VIOLACEA. Specimens, 2½ feet to 8 feet, \$3.60 to	15.00
A variety with deep blue color and very long needles.			
ABIES NORDMANNIANA (Nordman's Fir), Specimens 5 to 8 feet, \$3.00 to	20.00
Lustrous deep green foliage and symmetrical form. 18 to 24 inches.	1.50
One of the best of the silver firs. 12 to 18 inches.	1.00	8.00
ABIES PICEA (European Silver Fir) Specimens, 5 to 8 feet, \$3.00 to	10.00
ARBORVITAE, see Thuya.			
BALSAM FIR, see Abies.			
BLUE SPRUCE, see Picea Pungens.			
BIOTA, see Thuya.			
CEDAR, see Juniper.			
CHAMAECYPARIS OBTUSA (Hinoki Cypress), Spec. 3 to 5 feet, \$3.00 to	20.00
A very beautiful species of evergreen of refined appearance, medium size, remaining green through the winter. 2 to 3 feet.	1.50	12.50
1 to 2 feet.	1.00	7.50	60.00
CHAMAECYPARIS OBTUSA AUREA..... Specimens, 2 to 4 feet, \$2.00 to	10.00
Similar to the above but the foliage is a rich yellow. 1 to 2 feet.	1.00	8.00
CHAMAECYPARIS OBTUSA VAR. LYCOPODIODES, 18 to 24 inches.	1.50	12.50
Low form with a rich green moss-like effect. 12 to 18 inches.	1.00	7.50
CHAMAECYPARIS OBTUSA VAR. NANA Specimens, 2 to 4 feet, \$3.00 to	50.00
Compact form and deep green foliage. 18 to 24 inches.	2.50	20.00
CHAMAECYPARIS OBTUSA VAR. NANA AUREA..... 18 to 20 inches.	2.00	17.50
Like the preceding except that the foliage is light green tipped with golden. 15 to 18 inches.	1.50	12.50
12 to 15 inches.	1.00	8.00	60.00
CHAMAECYPARIS PISIFERA (Sawara Cypress) 24 to 30 inches.	1.25
The pea-fruited species of the Japan Cypress. 18 to 24 inches.	.75	6.00
CHAMAECYPARIS PISIFERA VAR. AUKEA 2 to 3 feet.	1.75	15.00
Golden form of Pisifera, foliage light green tipped with golden yellow. 12 to 15 inches.	1.00	8.00	60.00
8 to 12 inches.	.50	4.00	85.00
CHAMAECYPARIS PISIFERA VAR. NANA VARIEGATA 12 to 18 inches.	1.50
A very dwarf form with a mixture of white variegation. 4 to 6 inches.	.50	3.50
CHAMAECYPARIS PISIFERA VAR. FILIFERA, 5 to 15 feet, \$5.00 to	50.00
Interesting form with thread-like branchlets, forming a shower-like effect of green. 3 to 4 feet.	2.00	17.50
2 to 3 feet.	1.50	12.50	80.00
CHAMAECYPARIS PISIFERA VAR. FILIFERA AU-REA Specimens, 2 to 6 feet, \$3.00 to	10.00
A rare and beautiful golden form of preceding. 18 to 24 inches.	2.00	18.00
CHAMAECYPARIS PISIFERA VAR. LEPTOCLADA.. 10 to 12 inches.	1.50
Dwarf and very distinct; bluish above, silvery beneath. 8 to 10 inches.	.75	6.00
CHAMAECYPARIS PISIFERA VAR. PLUMOSA Specimens, 2 to 10 feet, \$2.50 to	50.00
Dwarf green form, very bushy and if trimmed, can be made almost any form. 18 to 24 inches.	2.00
12 to 18 inches.	1.50	12.50
CHAMAECYPARIS PISIFERA VAR. PLUMOSA ARGENTEA. Specimens, 15 to 18 inches, \$2.00 to	4.00
Very like preceding, but even more compact. New 12 to 15 inches.	1.50	12.50
growth silver tipped, producing a strong contrast. 8 to 12 inches.	1.00	6.00	40.00
CHAMAECYPARIS PISIFERA VAR. PLUMOSA AUREA. Specimens, 2 to 15 feet, \$2.50 to	50.00
Similar to the two preceding forms, but with a rich warm golden foliage. 18 to 24 inches.	1.50	12.50
12 to 18 inches.	1.00	7.00
8 to 12 inches.	.75	5.00	40.00
CHAMAECYPARIS PISIFERA VAR PLUMOSA VARI-RIEGATA 18 to 24 inches.	1.50	12.50
Similar to the three preceding forms in habit of growth; deep green, freely mixed with fine white. 12 to 18 inches.	1.00	7.00
8 to 12 inches.	.75	6.00	40.00
CHAMAECYPARIS PISIFERA VAR. SQUARROSA VEITCHII. Specimens, 2 to 5 feet, \$1.50 to	10.00
Charming form, with a compact, feathery growth of bluish-green color, changing to bluish-maroon in winter. 18 to 24 inches.	1.00	8.00
15 to 18 inches.	.75	6.00	40.00
CHAMAECYPARIS SPHAEROIDES (White Cedar) 2 to 2½ feet.	1.00	8.00
CYPRESS, see Chamaecyparis.			
DOUGLASS SPRUCE, see Pseudotsuga.			
FIR, see Abies.			
HEMLOCK, see Tsuga			
JUNIPER, see Juniperus.			
JUNIPERUS COMMUNIS (Juniper)..... Specimens, 3 to 8 feet, \$2.50 to	10.00
Flat habit, making spreading bushes. 2 to 3 feet.	1.50
JUNIPERUS COMMUNIS VAR. AUREA..... 12 to 18 inches.	1.50	12.50
Very fine golden form of the above. 8 to 12 inches.	1.00	7.50
JUNIPERUS COMMUNIS VAR. HIBERNICA (Irish)... 2 to 3 feet.	1.50
The well-known Irish Juniper, pyramidal in form. 1½ to 2 feet.	1.00	9.00
JUNIPERUS CHINENSIS (Chinese Juniper). Specimens, 2 to 3 feet, \$2.00 to	5.00
Foliage light green; especially rich in the winter. 18 to 24 inches.	1.50
JUNIPERUS CHINENSIS VAR. AUREA (Golden Chinese Juniper) Specimens, 3 to 5 feet, \$3.00 to	10.00
JUNIPERUS JAPONICA..... Specimens, 2 to 3 feet, \$2.50 to	5.00
An interesting, low-growing form from Japan.			

EVERGREEN TREES—Continued.		Each.	Per 10.	Per 100.
JUNIPERUS SABINA VAR. PROSTRATA, Specimens, 2 to 3 feet, \$2 to	3.00	
Clings to the ground. Fine for rock gardening. 1 to 2 feet.	1.50	
JUNIPERUS VIRGINIANA (Red Cedar). Native collected Specimens, 8 to 20 feet, \$3.00 to	20.00	
Nursery-grown Specimens, 4 to 10 feet, \$1.50 to	10.00	
Our native red cedar, well known for its striking 3 to 4 feet.	1.00	6.50	
form and beautiful color. 2 to 3 feet.	.50	3.50	20.00	
JUNIPERUS VIRGINIANA VAR. GLAUCA Specimens, 5 to 6 feet, \$3.00 to	8.00	
A silvery form of the preceding. Very beautiful. 4 to 5 feet.	2.00	17.50	
3 to 4 feet.	1.50	12.50	
JUNIPERUS VIRGINIANA VAR. PENDULA Specimens, 3 to 8 feet, \$2.00 to	10.00	
This variety has long gracefully drooping branches. 2 1/2 to 3 feet.	1.50	12.00	
PICEA ALBA (White Spruce) Specimens, 4 to 10 feet, \$3.00 to	20.00	
This fine compact native spruce resembles the well-known Norway Spruce in general appearance excepting 2 to 3 feet.	1.50	12.50	
that it is much more compact and a slower grower. It is also very much hardier. 3 to 4 feet.	1.00	7.50	60.00	
1 to 2 feet.	.50	4.00	35.00	
PICEA ALBA VAR. AUREA Specimens, 2 to 8 feet, \$2.00 to	20.00	
Glory of Spruces, silvery. 12 to 18 inches.	1.00	6.00	
PICEA BICOLOR (Acock's Spruce) Specimens, 2 to 6 feet, \$2.00 to	15.00	
European species, leaves green above and silvery blue beneath. Very compact in habit of growth. 12 to 18 inches.	1.50	12.50	
PICEA ENGELMANNI Specimens, 3 to 5 feet, \$2.00 to	10.00	
One of the best Rocky Mountain evergreens. Effect of the tree very striking. 8 to 12 inches.	1.00	7.50	
8 to 12 inches.	.75	4.50	
PICEA EXCELSA (Norway Spruce) Specimens, 6 to 15 feet, \$3.00 to	30.00	
Universally known and planted. Very rapid growth of a pleasing dark green. Makes a fine specimen and is valuable for wind-break purposes. It also makes a very compact hedge, especially where one more than ten feet high is desired. Even large specimens transplant with safety. Inquire for special prices for hedge purposes. 5 to 6 feet.	2.50	22.50	
4 to 5 feet.	2.00	17.50	
3 to 4 feet.	1.50	12.50	100.00	
2 to 3 feet.	1.00	7.50	60.00	
1 to 2 feet.	.50	4.00	30.00	
Following are grafted varieties.				
PICEA EXCELSA VAR. AUREA Specimens, 3 to 8 feet, \$3.00 to	15.00	
With golden yellow foliage, very effective. 12 to 18 inches.	.75	6.00	
PICEA EXCELSA VAR. CONICA Specimens, 18 to 36 inches, \$2.00 to	5.00	
Very compact and striking. 12 to 18 inches.	1.00	7.00	
PICEA EXCELSA VAR. ELEGANTISSIMA PENDULA. Silvery foliage beautifully disposed. Specimens, 3 to 10 feet, \$2.00 to	15.00	
PICEA EXCELSA VAR. GREGORIANA Specimens, 1 to 4 feet, \$2.50 to	10.00	
Forms very dwarf, round-headed plants, most unique.				
PICEA EXCELSA VAR. MINIMA GLAUCA, Specimens, 1 to 3 feet, \$2. to	10.00	
Another very dwarf form. 18 inches to 2 feet.	1.50	12.50	
PICEA EXCELSA VAR. PENDULA (Weeping). Specimens, 3 to 10 feet, \$2.00 to	20.00	
Also known as inverta, foliage deep green and abundant, resembles the well-known weeping beech in form. 2 to 3 feet.	1.50	
1 to 2 feet.	1.00	8.00	
8 to 12 inches.	.75	6.00	
PICEA EXCELSA VAR. PYRAMIDALIS. Specimens, 3 to 6 feet, \$2.00 to	10.00	
Striking form of very rapid growth and upright habit. 2 to 3 feet.	1.50	12.50	
PICEA ORIENTALIS (Oriental Spruce) Specimens, 2 to 3 feet, \$2.00 to	6.00	
A genuine gem among evergreens, of compact habit. 20 to 24 inches.	1.50	12.50	
15 to 20 inches.	1.00	9.00	60.00	
PICEA PUNGENS (Colorado Blue Spruce) Specimens, 1 to 5 feet, \$3.00 to	20.00	
Perhaps the most popular evergreen now planted in the east and the demand, especially for the blue specimens, is equal to the supply. We have a large stock all several times transplanted. 2 to 3 feet.	3.00	25.00	
18 to 24 inches.	1.75	15.00	
15 to 18 inches.	1.25	10.00	90.00	
12 to 15 inches.	.75	6.00	40.00	
PICEA PUNGENS (Koster's Blue Spruce) Specimens, 3 to 10 feet, \$5.00 to	60.00	
A strain, with the brightest blue color yet obtained. Introduced from Holland and in such great demand that they cannot be produced fast enough to meet it. 24 to 30 inches.	8.00	64.00	
15 to 20 inches.	5.00	45.00	
15 to 20 inches.	3.00	28.00	
PICEA PUNGENS (Pendula) Specimens, 4 to 8 feet, \$3.00 to	20.00	
A new and beautiful form with drooping branches.				
PINE, see Pinus.				
PINUS CEMBRA (Stone Pine) Specimens, 2 to 7 feet, \$2.50 to	25.00	
Elegant pine of the White pine tribe with very symmetrical habit while young. It is of very slow growth. 18 in. to 2 feet.	1.50	
12 to 18 inches.	1.00	7.50	
PINUS DENSIFLORA (Japanese Red Pine), Specimens, 2 to 5 feet, \$2 to	8.00	
A strikingly beautiful pine of refined habit. 2 to 3 feet.	1.50	12.50	
PINUS DENSIFLORA VAR. AUREA 15 to 13 inches.	3.00	
A rare variety, with golden foliage. 12 to 15 inches.	2.00	18.00	
PINUS EXCELSA (Bhotan Pine) Specimens, 4 to 8 feet, \$3.00 to	15.00	
Very rapid growing pine resembling the native white pine somewhat; the foliage is very much longer. 3 to 4 feet.	2.00	
2 to 3 feet.	1.50	
PINUS FLEXILIS (Limber Pine) 12 to 15 inches.	1.00	7.50	
Charming pine from high altitudes. Rocky Mountains. 10 to 12 inches.	.75	6.00	
PINUS LARICIO VAR. AUSTRIACA (Austrian Pine). Specimens, 4 to 8 feet, \$1.00 to	15.00	
Well known and much planted. Very rapid growth of pleasing color. Does very well at the seashore. 3 to 4 feet.	1.50	12.00	90.00	
2 to 3 feet.	1.00	7.50	60.00	
PINUS LARICIO VAR. COMPACTA NANA 12 to 18 inches.	3.50	
Dwarf, forming a compact cushion of green. Rare. 8 to 12 inches.	3.00	
PINUS MONTANA (Mountain Pine) Specimens, 2 to 3 feet, \$1.50 to	5.00	
Dwarf grower and very hardy. 15 to 20 inches.	1.00	9.00	
PINUS MONTANA VAR. MUGHUS Specimens, 2 to 6 feet, \$2.00 to	15.00	
One of the best dwarf pines, thrives well in almost any dry soil, and makes a very fine effect as a foreground. 12 to 18 inches.	1.50	
PINUS PONDEROSA (Bull Pine) Specimens, 4 to 8 feet, \$3.00 to	10.00	
Sturdy and rapid grower. A Western species, strong and effective in outline. 3 to 4 feet.	2.00	17.50	
2 to 3 feet.	1.50	12.50	
PINUS RESINOSA (Norway Pine) Specimens, 3 to 6 feet, \$2.00 to	10.00	
Very ornamental and extremely hardy. 2 to 3 feet.	1.50	
PINUS STROBUS (American White Pine) Specimens, 5 to 12 feet, \$2.00 to	20.00	
The grandest of our native evergreens and esteemed for its great beauty. The small trees in the Nursery 4 to 5 feet.	1.50	12.50	
3 to 4 feet.	1.05	9.00	80.00

SCIADOPITYS VERTICILLATA (Umbrella Pine)				
Specimens, 3 to 8 feet, \$5.00 to		25.00
This rare and perfectly hardy evergreen from Japan is 30 to 36 inches.		4.00	35.00
now becoming better known in this country. It always 24 to 30 inches.		3.00	25.00
attracts the eye by its unique beauty. Its growth is in 20 to 24 inches.		2.50	20.00
the form of a narrow pyramid, the leaves are dark green. 18 to 20 inches.		2.00	15.00
SPRUCE , see <i>Picea</i> and <i>Abies</i> .				
TAXUS BACCATA VAR. REPANDASpecimens, 1 to 3 feet, \$1.00 to		3.00
TAXUS CANADENSIS (American Yew)Specimens, 18 to 24 inches. \$2 to		3.00
A native evergreen, very hardy, and is one of the 12 to 18 inches.		1.00	7.50
few evergreens that even prefers a shady situation.				
TAXUS CUSPIDATA VAR. NANA (Japan Yew) ,				
Specimens, 18 to 24 inches, \$2.00 to		10.00
A rare and beautiful, low-growing evergreen from 15 to 18 inches.		1.75	15.00
Japan. It is as hardy as an oak and remains a deep 12 to 15 inches.		1.50	12.50
green through the winter, even where exposed to the 8 to 12 inches-		1.00	7.50
sun and wind. It is a very slow grower. 6 to 8 inches.		.75	6.00	40.00
THUYA JAPONICA (Thuyopsis Standishii) ...Specimens, 5 to 7 feet, \$5 to		\$10.00
From Japan. Makes a very graceful tree. Hardy. 2 to 3 feet.		2.00
THUYA OCCIDENTALIS (American Arborvitae) ,				
Specimens, beautifully trained, 3 to 15 feet, \$1.00 to		25.00
Also known as White Cedar. All things considered 6 to 7 feet.		2.00	17.50
this native evergreen and its numerous varieties are 5 to 6 feet.		1.50	12.50
among our most useful evergreens. Very easy to trans- 4 to 5 feet.		1.25	9.00
plant and thriving on a great variety of soils, they are 3 to 4 feet.		1.00	7.50	\$60.00
naturally in very great demand. Our stock, especially in 2 to 3 feet.		.75	6.00	40.00
the small and medium sizes, is very large. <i>Special prices</i> 8 to 12 inches.		.35	2.50	15.00
<i>will be quoted for hedge plant grades.</i>				
THUYA OCCIDENTALIS GEO. PEABODY , Specimens, 2 to 5 feet, \$2 to		8.00
One of the best golden forms. 18 to 24 inches.		1.00	7.50
THUYA OCCIDENTALIS VAR. GLOBOSA ,				
Specimens, 2 to 4 feet, \$2.50 to		10.00
Develops into globe-like head, quite dwarf, seldom 18 to 24 inches.		1.50	12.50
getting to be more than three feet high. 12 to 18 inches.		1.00	7.50
THUYA OCCIDENTALIS VAR. HOVEYI , Specimens, 2 to 4 feet, \$1.00 to		5.00
Globular in form; foliage light green. 18 to 24 inches.		1.00	9.00
THUYA OCCIDENTALIS VAR. PYRAMIDALIS ,				
Specimens, 5 to 10 feet, \$2.00 to		20.00
Pyramidal form, rich dark green foliage. Very useful 3 to 4 feet.		1.50	12.50
where a formal column of deep green is required. This 2 to 3 feet.		1.00	7.50	50.00
form is also very desirable for hedges. 1 to 2 feet.		.75	6.00	40.00
THUYA OCCIDENTALIS VAR. WAREANA (Siberian) ,				
Specimens, 2 to 6 feet, \$2.50 to		10.00
Compact and dense of foliage, the color remains quite 3 to 4 feet.		1.50	12.50
a rich green throughout the year. One of the best. 2 to 3 feet.		1.00	7.50
THUYA ORIENTALIS (Oriental Arborvitae)				
Specimens, 3 to 10 feet, \$1.50 to		10.00
Brilliant evergreens with close ascending branches. 2 to 3 feet.		1.00	6.00
TSUGA CANADENSIS (American Hemlock)4 to 7 feet, \$1.50 to		15.00

PAEONIA "FRANCIS ORTEGAL." One of the best dark red late sorts. *CAROLINE MATHER* and *DELACHEI* are other splendid late crimson sorts.

Choice Herbaceous Paeonies for August, September and November Planting.

THE Paeony is to-day without a rival as a hardy garden favorite and is quite naturally so, as no other hardy garden plant probably thrives with as little special care and produces so fine a display of gorgeous blooms. The great diversity of color and form which now is available in the many new varieties very much increases their value. We have a great number of the new varieties on trial in our testing grounds and feel confident that these we list represent the cream of the lot. We have been so careful in the culture of these plants that we have every reason to believe that they are true to name and description. We recommend planting Paeonies in the early autumn. The larger sizes if set out at this season will give a fine display of bloom the following season.

Culture.

Any good garden soil is suitable for Paeony culture. While they undoubtedly thrive most luxuriantly in full sunlight, they will do very well under partial shade of trees, provided they have sufficient nourishment. Those who anticipate maximum results will do well to thoroughly enrich the ground by digging it over to a depth of at least eighteen inches and putting in a good supply of well-rotted manure. It is safe to say that the conditions which would be favorable to the vigorous growth of rose plants will give equally good results with the Paeonia.

Prices for Herbaceous Paeonies, except where otherwise stated.

Selected List of Varieties.

The number to the left of the variety indicates the sizes we have to offer of that variety.

- 1, 2, 3, 4. **Festiva-Alba.** Very double and pure white, tinted creamy yellow in center; fragrant and one of the best.
- 2, 3, 4. **Atrosanguinea.** One of the best double late reds.
- 2, 3, 4. **Boule de Neige.** Very light, sulphur white with crimson spots. \$1.00, 75c., 50c.
- 1, 2, 3, 4. **Canari.** White with yellow center. \$1.00, 75c.

Herbaceous Paeonies - Continued.

Number to the left indicates the sizes. See preceding page.

- 1, 2, 3, 4. **Caroline Mather.** Very large double, rosy crimson.
 1, 2, 3, 4. **Cleopatra.** Violet rose, rich yellow stamens. Single. \$1.50, \$1.00, 75c., 50c.
 1, 2, 3, 4. **Delachei.** One of the best brilliant late dark reds.
 1, 2, 3, 4. **Duc de Wellington.** Sulphury white sort, of fine form, recently sent out. \$1.50, \$1.00, 75c., 50c.
 1, 2, 3, 4. **Elegans.** Outer petals rose; center full with curving and twisting petals, shading from light rose to white; early.
 1, 2, 3, 4. **Festiva Maxima.** Considered the best white yet introduced, both in color and form. Of the purest white, splashed with a few streaks of crimson. \$1.50, \$1.00, 75c., 50c.
 1, 2, 3, 4. **Fragrantissima.** Early and very free bloomer. Outer rows of petals clear rose, inner petals very numerous.
 1, 2, 3, 4. **Francis Ortegale.** Deep maroon red. (See illustration.)
 2, 3, 4. **Fuljisomeginu.** Single, light rose, darker at base, yellow center. \$1.00, 75c., 50c.
 1, 2, 3, 4. **Gigantea.** Free grower, very large, deep pink.
 1, 2, 3, 4. **Gladstone.** Satiny pink petals, inner petals creamy pink.
 1, 2, 3, 4. **Golden Harvest.** Nearest to yellow, ideal form. \$1.50, \$1.00, 75c., 50c.
 1, 2, 3, 4. **Humeii Rosea.** Enormous double flowers of a clear rose, late.
 2, 3, 4. **Madame de Verneville.** Beautiful flower, anemone shape, compact form, edge of broad light rose petals, flesh color with carmine spots, very fine. \$1.50, \$1.00, 75c.
 2, 3, 4. **Minenoyuki.** Pure white, delicate pink tintings, petals gracefully disposed. Single. \$1.00, 75c., 50c.
 3, 4. **Mons Rousselon.** Free bloomer, clear pink, fine for cutting. 75c., 50c.
 2, 3, 4. **Officinalis Flora Plena.** Double crimson. Piny of the old gardens.
 2, 3, 4. **Officinalis Mutabilis.** Early, double, light pink.
 2, 3, 4. **Officinalis Rosea Plena.** Very early, clear rose.
 3, 4. **Officinalis Rosea Superba.** Light rose, beautiful flower, very early. \$1.50, \$1.00.
 1, 2, 3, 4. **Pauline.** Rosy lilac, creamy white center.
 3, 4. **Pink Beauty.** Double, free bloomer, light clear pink. 75c., 50c.
 1, 2, 3, 4. **Reine Hortense.** Late flowering; light rose and full to the center.
 2, 3, 4. **Richardson's Rubra Superba.** Large, late, vigorous, called the Red Festiva Maxima. \$1.50, \$1.00, 75c.
 1, 2, 3, 4. **Rubra Triumphans.** (Delachei.) Bright carmine, almost a single flower.
 2, 3, 4. **Solfatare.** Sulphur yellow, very fine. \$1.50, \$1.25, \$1.00.
 2, 3, 4. **Someganoko.** Rosy crimson, golden center. Single. \$1.00, 75c., 50c.
 3, 4. **Tenuifolia.** Fern-leaved paeonia, deep crimson single flowers, very early.
 3, 4. **Tenuifolia Flora Plena.** Double crimson, otherwise like preceding.
 1, 2, 3, 4. **Thorbeckii.** Deep red pink and fine form; lighter in center.
 2, 3, 4. **Whitleyi Major.** Pure white, large flower, rich deep yellow center. Single. \$1.25, \$1.00, 75c.

For prices of above Herbaceous Paeonia see preceding page.

Tree Paeonies.

A VERY distinct type of Paeonia, the only one of the species which makes a shrub-like growth. The flowers resemble the herbaceous kinds somewhat but they are considered by many more stately. They are extremely hardy and when well-established make a grand display. The flowers appear even earlier than the old crimson paeonia.

Price of Tree Paeonies, \$0.50 to \$5.00 each, according to size and variety. Inquire for varieties, sizes and prices.

Portion of Field of HERBACEOUS PAEONIES at the Nursery, showing some of the Fine White Varieties, including Festiva Maxima, Festiva Alba, Duc de Wellington, etc.

"The paeonies, phlox and lily bulbs came in good order and look very nice."

Japanese Iris—*Iris Laevigata* or *Kaempferi*.

JAPANESE IRIS,
Variety Pyramid, and is one of the best.

THIS splendid type of Iris is now considered one of the most important of our strictly hardy permanent garden plants. For effective habit and gorgeous display of color it stands alone at its blossoming season, which is June 20th to August 1st here at the Nursery. German Iris have been gone several weeks, Paeonies have past, most Roses are beyond their best, and in this grand flower, just in its prime, we have opportunities for special garden effects.

The plants form strong clumps of effective narrow flag-like foliage, one to four feet high, which remain bright and green all summer. The flower stems are slender and graceful, lifting the flower heads well above the foliage, and several flower buds are produced on a single stem. The flowers are many of them twelve inches in diameter and of the most exquisite combinations of colors from the purest white through every possible range of color to the deepest blue black, including many rosy shades, the richest of violets, royal purples, etc., and often so complicated are the markings on a single flower that a clear word description would be hardly possible. Most of the varieties have a conspicuous rich, deep, velvety yellow splash at the base of each petal or segment, adding greatly to the richness of the color effect. The flowers are referred to for convenience of description as double and single. When both the outer and inner segments are broad and flattened the flower is called double. When the outer three segments only are broad and flattened and the three inner segments are upright and narrow, the flower is considered single. While the double varieties are in most instances gorgeous, many of the so-called single varieties are equally so and quite as desirable.

Cultivation.

Japanese Iris will thrive in any good garden soil, but respond quickly to extra fertilizing, and while they don't demand it to give good results, it is no doubt a fact that they will reach their highest development where they can be watered freely just before and during the season of blossoming. We get very satisfactory results at the Nursery, however, without this extra care.

August and September Planting.

All the various Iris transplant at this season to special advantage, becoming so thoroughly rooted before winter that they bloom freely the following season.

Prices of all Iris Listed.

Heavy plants	Each, \$0.50	Per 10, \$4.00	
Established plants	Each, .25	Per 10, 2.00	Per 100, \$15.00
Smaller plants	Each, .15	Per 10, 1.25	Per 100, 8.00

NOTE—Five different kinds may be ordered at per 10 rates. Five of a kind at hundred rates if 25 or more are ordered. If selection of varieties is left to us we will select such kinds as we believe will give the best results.

Prices of Iris in Mixture of Varieties.

Heavy undivided plants	Each, \$0.15	Per 10, \$1.00	Per 100, \$8.00
Well established plants	Each, .10	Per 10, .75	Per 100, 4.00

These mixed sorts are all named varieties without labels, and can be furnished to color if desired, otherwise a good assortment is sent. Our selection only.

"The White Pines came just in the right time. We had everything ready for them and they were set out at once according to your directions. They look fine and please us very much."

"The trees arrived and were planted yesterday. They seem in excellent condition."

Japanese Iris—Continued.

Choice List of Japanese Iris.

THE following list of varieties we believe to be as fine a collection as ever offered. Many of them are of our own importation direct from Japan. All that we list have been under cultivation at the Nursery for several years, and by thorough roguing at the blossoming season each year we believe that these we offer are true to description.

NOTE.—In the following description O. S. refers to the outer three segments or petals; I. S. refers to the inner three segments or petals.

For prices see page 8.

Single Varieties.

Kathryn. Early, tall and vigorous; O. S., broad, pale blue, beautifully veined royal purple; I. S., upright, narrow, deepest purple, margined white.

Snow Bound. Vigorous, attractive, pure white variety. Splendid substance.

Rosy-Morn. Mid-season, tall and graceful, flower medium to large; O. S., broad and reflex, white at base shading to deep rose at margins; I. S., upright, creamy white at base, shading to clear rose on margins.

Double Varieties.

Blue Jay. Late, medium tall, vigorous, very large, splendid form and substance, segments broad, almost uniform in shape, deep yellow at base changing to a soft azure blue, becoming deeper at the margins and throughout beautifully marbled. Style waxy white bordered deepest blue.

Dinah. Mid-season, very tall and much branched, medium to large, the broad segments so much ruffled as to give a very double effect, deep blue suffused with deepest royal purple, the splash at base is conspicuous, style upright and crested.

Francella. Early, medium tall, medium size, segments uniform size and broad, almost white at base changing to deep rose at margins, effective.

Gold Bound. Mid-season to late, very robust, stems branched, flowers of larger size, segments so full as to present a very solid flat effect, the margins beautifully ruffled and reflex, of the purest waxy white showing the yellow markings at the base with fine effect.

Pyramid. Early to late, very strong grower and free bloomer, of largest size and splendid form, segments light blue at base shading to deep blue on margins suffused with royal purple, one of the best for general culture.

Purity. Early to mid-season, medium grower, medium size, of the purest waxy white, flower very flat and effective, O. S. conspicuously banded with yellow.

New Varieties imported direct from Japan.

These have flowered in the Nursery and the description can be depended upon.

No. 3. Tall, vigorous, pure white, very fine, single.

No. 15. **Urc-in.** Double, mid-season, tall and much branched, flower large and very full, segments slightly cup-shaped, color pale blue white at base changing to rich clear blue at margins, the segments being richly veined with deep blue.

No. 18. **Kumo-no-sho.** Double, mid-season, tall, good size, white at base, freely veined rose, which suffuses the segment at outer margin.

No. 20. **Kumo-no-nye.** Late, double, splendid form, richest velvety royal blue, suffused slightly with royal purple, the brilliant yellow throat of each segment adding to the color effect; style upright and much crested of a deep blue black.

No. 45. Double, early, very tall and branching, flower large and showy, segments rich blue penciled deeper blue with white radiating lines, springing from a base of deepest yellow; style upright and crested.

For prices see page 8.

From photo. taken at our Nursery July 1st, showing Japanese Iris (Pyramid) in full bloom.

German Iris, Queen of Gypsies.

German Iris—*Fleur-de-Lis*.

And other Iris not Japanese.

THESE splendid garden plants have been favorites for years and are so hardy and easily grown and produce such a bountiful display of beautiful flowers that they can be considered one of the most important of our garden plants. They are of easiest culture, requiring no special treatment, and will remain for years, even enduring neglect, and produce regularly each year their fine display of blooms. The range of color and form is very great, as well as their season of blooming, beginning with the hybrids of *Pumila* types as early as April 25, extending well up into June with some of the tall, late sorts.

Culture.

These Iris are of the easiest culture, any good garden soil is all that is required. They will grow well in partial shade, but produce their finest blooms in full sunlight. The best effects are produced where a number of plants of a kind are planted near enough together to give a generous mass effect.

Transplanting.

Iris can be transplanted any season of the year. Early autumn, however, is especially favorable, as the plants get so well rooted that they bloom freely the following season. The large size are recommended where immediate effects are desired.

Selected List of German Iris.

Our collection includes a large number of varieties which we do not catalogue, as we prefer to list only such kinds as are quite distinct and of proved merit, and cover the widest range of color, form and season of blooming.

NOTE.—In describing the Iris “outer segments” refers to the outer or reflex part of the flower; “inner segments” refers to the erect or inner part of the flower. O. S. stands for outer segments; I. S. stands for inner segments in the following descriptions:

- Auriole.** Late, medium dwarf, which are beautifully penciled with deep, velvety royal purple.
- Bridesmaid.** Medium to tall, mid-season; I. S., very full and incurved light rosy blue, changing to deeper blue on the margins, which are exquisitely penciled; O. S., almost white, distinctly penciled with deep blue in a most interesting way.
- Candicans.** Mid-season and medium size of growth; I. S., very little incurved and of the clearest pale blue; deepest royal purple, freely veined with splashes of pure white. Very distinct.
- Celeste.** Tall, mid-season; I. S., clear pale blue; O. S., shaded darker, large fine form.
- Decora.** Medium to low, mid-season; I. S., clear blue; O. S., white veined with rosy purple, very free flowering.
- Edith Cook.** Medium to low grower, mid-season to late, of strong, vigorous habit; I. S., of the clearest deep yellow, slightly incurved; O. S., broad and spreading, freely splashed and veined deep rosy purple on a white background and bordered with deep old gold.
- Ernest Bernot.** Early to mid-season, medium to tall, very free bloomer; I. S., delicate orange exquisitely suffused rosy purple; O. S., creamy white, intricately and freely veined with the deepest royal purple.
- Garfield.** Tall, medium to late; I. S., light blue, changing to rosy lilac on margins; O. S., rich royal purple, light beard.
- La Valette.** Tall, late, good full form. I. S., very full and incurved; O. S., somewhat flaring, general color, a clear pale blue, slightly suffused with rosy tints.
- Mad. Chereau.** Late and tall, of beautiful and unique form; I. S., pale blue and so penciled with darker blue on the margin as to suggest fine embroidery; O. S., similar but a little lighter. A most distinct sort.
- Mad. Modeste.** Medium to late; I. S., incurving, pale blue splashed and margined purple; O. S., white, margins penciled purple.
- Pallada.** Very late and tall. Resembling the early Florentine in its fine full large form. Color, strong, rich blue; O. S., being suffused with a slight suggestion of velvety royal purple.

German Iris—Continued.

Pond Point. Tall, very vigorous, very large and handsome; I. S., clearest deep blue and well formed; O. S., white at base, veined with royal purple which suffuses the rest of the segment.

Queen of Gypsies. Tall and late; I. S., rich old gold, delicately suffused and penciled with rosy lilac; O. S., clear lilac overspread with beautiful pencilings of a deeper blue, interlaced with white and some chestnut markings.

Sans Souci. Medium to late season; I. S., clearest intense yellow, incurved; O. S., deepest yellow splashed with white at base, intermixed with russet veining, this veining quite covering the segment towards the outer margins. Medium to low in habit of growth and one of the best in its class.

Silver King. Similar if not the same as Florentine. The earliest of the tall large type, of ideal full form, and when first unfolding is of the softest pale blue, becoming almost white at maturity. Very fragrant.

Walneri. Mid-season and medium grower; I. S., incurving and of a clear light blue towards the tips; O. S., clear white at base, abruptly changing to clear blue suffused with royal purple, richly veined with deeper color. See the foreground blooms in accompanying illustration at foot of this sheet.

The following varieties are among our best sorts, but as we are not sure of their names, we offer them under numbers only:

No. 4. Medium to tall; full, splendid form; I. S., full, palest blue, suffused with sulphur; O. S., same with deeper pencilings.

No. 15. Late and medium tall, very robust and free; I. S., incurved but somewhat open, yellowish buff suffused with rose; O. S., whitish at base, richly veined and penciled red-maroon so freely as to quite cover the flower part of segment.

No. 16. Late, medium tall, splendid full form; I. S., blue at base, changing to rosy blue towards tips; O. S., rich rosy purple, beautifully penciled and veined deep maroon.

For prices see page 8 under Japanese Iris.

Other Desirable Garden Iris.

(Not including Japan Iris.)

Cristata. An interesting very dwarf species, but 3 to 6 inches high, pale blue, about the earliest to flower.

Pseudacorus. Very robust, flowers of medium size, intense clear, deep yellow. In early June.

Pumila. Dwarf and early, blooming in April. These we offer are mixed hybrids, varying in color from deep blue to yellow.

Siberica. Robust growers, foliage somewhat like the Japan Iris but more slender flowers, borne on 2 to 3 foot slender stems, well up above the foliage; color, clear rich blue. Flowers are somewhat larger than our native field Iris. In bloom with the late German Iris.

Siberica Alba. Similar to preceding, but white.

Siberica Fl. Pl. Double form. Blooms late with the Japan Iris.

Siberica var. Orientalis. A beautiful Iris of the most vivid velvety deep blue, of medium size and blooming with great freedom about June 10 to 20.

For prices see page 8 under Japanese Iris.

Field of German Iris at the Nursery. They are so carefully grown here that you may depend upon their being true to name and description.

Gorgeous Oriental Poppies (*Papaver* and *Orientalis*) Varieties.

The brilliancy of these Hardy Poppies is rivaled by no other garden flower.

OF all the strictly hardy garden flowers, none shine out more conspicuously and are better known than these gorgeous Oriental Poppies. Dazzling deep orange-scarlet is the color of the older types. The new varieties are equally dazzling in color, and range from the deepest scarlet and salmons to almost white. See list below. These gorgeous plants offer to garden lovers splendid opportunities for brilliant garden effects. We have worked up a fine stock of the best varieties of these Oriental Poppies, and offer the following list.

NOTE.—Oriental Poppies increase in size of plant but slowly, and where one wishes a generous mass effect, it is well to plant from three to a dozen plants of a variety within eight or ten inches of each other.

There is a prevailing impression that Oriental Poppies cannot be successfully transplanted. During August and September they can be transplanted, not only without loss, but if large roots are used they will produce an abundance of bloom the following season.

Varieties.

Blush Queen. Medium vigorous; blooms on slender stems. A peculiar gray-blush, suffused with carmine.

Princess Victoria Louise. Vigorous, medium tall, large, sturdy, splendidly formed, color delightful silvery rose splash at base, rich blue-black, center very dark.

Dazzler. Vigorous, large and well formed, color dazzling deep orange-scarlet.

Mahony. Size of bloom, medium to large. Color very deep, carmine red uniformly throughout. Very deep red-black splash at base of petal.

Mary Studholm. Sturdy, medium growth, luxuriant foliage. Flowers on stiff stems, blooms medium to large, of splendid substance, silvery salmon pink with touch of carmine.

Masterpiece. Vigorous, medium to tall, blooms on erect stems, large and well formed, color a charming gray-rose richly suffused with a lively pink.

Mrs. Marsh. Vigorous, flowers cup-shaped, orange-scarlet, lustrous black splash base of petal.

Goliath. Vigorous; flower stems 2 to 3 feet high, stiff and erect; blooms dazzling deep scarlet.

Queen Alexandra. Sturdy, vigorous, medium height, free bloomer, salmon, flushed with rose.

Rembrant. Very vigorous, two to three feet. Flower enormous size, often ten inches across. Distinct shade of most dazzling orange-red, suffused with salmon.

Royal Scarlet. Sturdy stems, firm and erect. Bloom finely formed, large, of the most glowing fiery scarlet.

For prices see page 13.

Hardy Phlox—*Paniculata* Hybrids.

WE have in this useful plant one that is perfectly hardy, of the easiest culture and will thrive in any garden soil and at the same time produce in greatest profusion quantities of showy, hydrangea-like plumes on upright stems, with a great range of colors from the purest white through pinks to the deepest fiery crimson. For producing brilliant color effects during July, August and September no plant is more useful.

List of Selected Varieties.

Ball of Fire. Crimson and very free bloomer; of dwarf habit.

Bouquet Flouiri. Medium dwarf in habit of growth; flowers white with crimson centers.

Caran d'Ache. A large flower of most perfect form, of a rosy carmine color, center violet.

Coquelicot. As brilliant as an Oriental poppy orange-scarlet and one of the best.

Etna. Bright red, tinged with salmon.

Hector. Fine pink, very large.

Hermine. (Dwarf). The dwarfiest variety in our collection, never exceeding ten inches in height; pure white flowers of good size, unequalled for bordering.

Independent. Tall grower, late bloomer, fine large creamy white flowers, one of the best whites.

Isaby. Medium tall grower, very vigorous, producing large panicles of fiery salmon-red florets.

Joan of Arc. Medium dwarf grower, medium early; florets large, pure white.

Marie Louise. Tall, medium late; flowers rose to white, varying in color on the same stem.

Pantheon. Very vigorous, early bloomer; florets of enormous size, clear deep rose pink.

Placida. Very strong grower and late, very large panicles of rosy lilac florets, of great substance.

Premier Minister. Very strong grower, late, enormous heads, pink, changing to the deepest crimson in the center.

Phlox Subulata—*Moss or May Pink*.

This is the plant that forms a low mat of evergreen foliage and in early Spring is completely covered with masses of bloom.

Subulata. The type with rosy lilac flowers.

Subulata Var. Alba. A white form of the above.

Subulata Var. Atro-Rubra. Clear deep claret.

Subulata Var. Sadie. Clear white with bluish tint.

Prices of all the Phloxes, see page 13.

Hardy White Phlox, Independent.

**Have a
Hardy
flower
Garden.**

Enjoy its increasing charm as each succeeding year adds to its ever changing beauty. Every day from earliest spring to late fall bringing its wealth of lovely color and form.

**Other Hardy
Herbaceous Plants.**

ALL plants whose roots are hardy and remain alive from year to year and whose tops annually die to the ground are classified under this heading. It includes such splendid garden plants as Paeonia, Iris, Larkspurs, etc. The great ease with which these plants can be grown and their great variety of color and form and season of bloom make them indispensable for the garden. Of late years, there has been a steadily increasing demand for this class of plants as well as a great improvement in the varieties, so that they now make an important feature in the business of many nurserymen. We are making these a specialty at the Nursery, growing them in large quantities out in the open fields under the most favorable conditions.

Autumn Planting.

Practically all the Hardy Herbaceous plants transplant to especial advantage at this season. Plantings become well-rooted before winter and are all ready for a fine display the following season.

"I wish to acknowledge receipt of plants sent me, which arrived in good condition, and from no one have I ever received more satisfactory ones."

We are always glad to advise with parties desiring special information about intended plantings and will be pleased to answer promptly any communications.

Holland Bulbs for fall planting.

WHAT a joy to watch for the first Snowdrops and Crocuses! Their appearance sends a pleasant thrill all through the garden lover, for spring-time is never far away when they arrive. The early Tulips, Hyacinths, Daffodils, Scillas, etc., soon follow in all their glory, and the garden where Dutch Bulbs are freely used is glorious with their graceful forms, brilliant colors and delicate perfumes all during the early spring.

It is desirable to place your Dutch Bulb order as early as possible so the bulbs can be shipped direct to you as soon as they reach us, even though you will not be ready to use them until later.

Single Hyacinths.

Baron Van Thuyll. Pure white, early.

Pot-Grown Strawberry Plants.

Strawberry Pot-Grown.

If *pot-grown* strawberry plants are set out in well-prepared ground during the months of August, September or early October, they will produce a good crop of berries the following season. The many advantages gained by the use of *pot-plants*, even at the advance in price over the ordinary layer-plants, make their use advisable even where large plantations are to be made, and for the garden offer every advantage, as they can follow garden vegetable crops.

Distillate and Staminate.

Varieties marked "P" are pistillate, and the varieties marked "S" are staminate. Every fourth row at least or every fourth plant in a row should be a staminate variety to get the best results.

How far Apart to Plant.

If for garden cultivation, plant in rows 18 inches apart and one foot apart in the row. If for field cultivation, plant in rows three to four feet apart and from 12 to 15 inches apart in the row. *If selection of variety is left to us, we will send the kinds we believe will give the best results.*

Select List of Well-Tested Varieties.

The following list covers the season of ripening from very early to late.

- Almo.** (S.) Tremendous bearer of large handsome fruits.
Brandywine. (S.) Of immense size, firm, solid and shapely. Rich, juicy and luscious.
Gandy. (S.) The leading late variety. Very robust habit. Fruit large, good quality.
Haverland. (P.) A fine grower, very productive. Long, medium size and good quality.
Lester Lovett. (S.) Extra late. Rich flavor, and with a delightful aroma.
McKinley. (S.) Great yielder of finely-formed rich-colored, delicious fruit. Mid-season.
President. (P.) Rich quality. Covering a longer season of ripening than any berry we have tested.
Rio. (P.) Very early. Medium size and splendid quality for so early a berry.
William Belt. (P.) Early season. Rich-colored, firm, and of the best quality.

Prices of Strawberry Plants.

Pot-grown, ready August 20th.....	Each, \$0.06	Per 10, \$0.50	Per 100, \$3.50	Per 1,000, \$30.00
Layer plants, ready September 15th.	Each, .04	Per 10, .30	Per 100, 1.25	Per 1,000, 5.00
Layer plants, after October 15th....	Each, .03	Per 10, .20	Per 100, 1.00	Per 1,000, 3.50

Not less than 5 of a kind at per 10 rates; 25 of a kind at per 100 rates; 250 of a kind at 1,000 rates.

Pulverized Sheep and Cattle Manure.

BOTH first cost, economy and ease of applying are too important factors to disregard in the handling of fertilizers. In Pulverized natural manures we have nature's own way and in a most convenient form for handling. They are just as they come from the stockyard pens, only they are thoroughly dried and put through pulverizing machines. If you have never used these pulverized manures, you will be agreeably astonished with the results.

Apply on the lawns in the fall and a deep green growth will quickly follow, which will remain throughout the season under favorable conditions. For applying at time of seeding down new lawns, nothing will give better results. For lawns apply on the surface broadcast 100 pounds to the 1,000 square feet; for the garden, two to three times this amount, depending upon the soil, two or three tone to acre.

Inquire for special printed matter.

Prices of Both Pulverized Sheep and Cattle Manures.

- In bags, 25 or more pounds and less than 100, per lb., 3c.
 In bags, 100 or more pounds and less than 500, per lb., 2c.
 In bags, 500 or more pounds and less than 2,000, per lb., 1½c.
 In bags, 2,000 lbs. (ton), \$25.00; five tons, \$115.00, F. O. B. New Haven, Conn.
 Car lots, in bag or bulk, 15 to 20 tons, f. o. b. your station, prices promptly quoted.
Five ton lots or less delivered from our own warehouse here at New Haven, Conn. Car lots shipped direct from Chicago.

Our Lawn Grass Seed Mixtures.

Five lawns can be established by fall seeding. The weather conditions are usually very favorable at this season.

We offer the best grade of re-cleaned grass seed.

Quantities to use for lawn making: 1 lb. for 200 square feet; 150 lbs. for acre.

Edgewood Mixture for General Use.

Composed of a variety of grasses, so as to produce a permanent velvety lawn under varying conditions and in the quickest time.

Edgewood Shady Place Mixture.

Specially suited for shady places.

Prices for the Above Two Mixtures.

Per lb., 25 cents; 3 lbs., 65 cents; 5 lbs., \$1.00; 10 lbs., \$1.85; 15 lbs., \$2.75; 25 lbs., \$4.25; 50 lbs., \$8.25; 100 lbs., \$16.00.

"I was very much pleased with the quality of shrubs sent, and will send in spring for the other list to be filled."

Grandiflora Alba, the New Hardy Hydrangea.

From photo taken at the Nursery July 3. This illustration gives a splendid idea of the grace and beauty of this New Hardy Hydrangea, and suggests its great possibilities.

THIS wonderful NEW HARDY HYDRANGEA bids fair to become a most popular hardy garden shrub just as soon as better known and enough stock can be propagated to supply the demand. No shrub has, in fact, appeared in years which combines so many attractive and desirable features. It is *perfectly hardy*, needing no protection, and will thrive in almost any location, even where quite shady, although it delights in a rich mellow soil. It attains a size of three to four feet high and spread as it develops, although it can be trimmed back quite to the ground each year if desired, and when so treated it sends up a number of vigorous stems, each crowned with an enormous head of bloom. As early as June 20th the flower heads are fully developed, which is a happy happening, as few shrubs are in blossom at this time. For a month or more the blooms remain pure white, then turn very slowly to a light green tint, and as the season advances assuming deeper green shades, finally toning down to the color of the foliage. The whole expression of the plant is refined and elegant, entirely free from the coarseness of some of the other Hydrangeas. (See illustration.) Plant it either as a specimen to develop individually, in detached beds or groups, or in groups as the fore-ground for other and taller shrubs, in fact, no other shrub lends itself to so many attractive uses.

When to Plant.

This NEW HARDY HYDRANGEA can be planted in the fall or spring if *field-grown plants* are used, and any time during the growing season by using *pot-grown plants*.

Prices for Fall. Delivery any time before October.

From 5-inch pots \$1.00 each \$9.00 per ten.

The above plants will become well rooted before winter and bloom freely next season.

Delivery after October First.

Dormant field-grown plants, strong 2 year old grade . . . \$1.00 each. \$9.00 per 10. \$75.00 per 100.

Dormant field-grown plants, strong 1 year old grade75 each. 6.00 per 10. 50.00 per 100.

Dormant field-grown plants, medium 1 year old grade50 each. 4.50 per 10. 0.00 per 100.

NOTE—All the above quoted plants will bloom the first season after planting.

WHAT OTHERS SAY.

"A very showy shrub is *Hydrangea Arborescens* var. *Grandiflora Alba* with its large heads of pure white flowers; it is certainly one of the best novelties of late years."

ALFRED READER.

"I have great confidence in this new Hardy Hydrangea. I have backed up this confidence by getting fifty plants of it. Were I in the parks I would have purchased a thousand for massing effects."

WILLIAM FALCONER

The Elm City Nursery Company,
New Haven, : : Connecticut.
